Subject: Adding Integrated Trailer brake Controller RPO JL1 -
keywords connector electric hydraulic itbc tow towing wire
wiring #PIT4332B - (08/16/2007)

Models: 2007-2008 Chevrolet Silverado
2007-2008 GMC Sierra

This PI was superseded to update model years. Please discard PIT4332A.

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition/Concern:

Some customers may request that dealers install the factory Integrated Trailer Brake Controller on their 2007 or 2008 Full Size pickup when the vehicle was ordered without RPO JL1.

Recommendation/Instructions:

This is to advise you that if the vehicle does not have RPO JL1, it can not be retro-fitted with a factory trailer brake controller.

Bulletin 06-08-45-008 or later advises how to install an aftermarket trailer brake controller on vehicles NOT equipped with RPO JL1.

Bulletin 07-08-45-001 or later advises how to install an aftermarket trailer brake controller under certain conditions if the vehicle IS equipped with RPO JL1.

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
