Description

GM CCA is pleased to announce the supersession of three OE oil filters. These new OE oil filters are an upgrade to the current filters.

Effective Date

Immediately

Additional Information

New Design:

- Larger cross section gasket to improve sealing and lock seam geometry robustness
- Metal endcaps adhered with hot melt
- Leak tested twice, second time with the gasket installed
- Automated assembly equipment with error proofing
- Molded nylon center tube
- OES (service) filter to be same as OEM (production) filter
- Cleanest filter GM has ever designed
